DETAILS

RECEIVER MODULE PARAMETERS:

Model: MX-05V

Working voltage: 5V DC quiescent current: 4mA

Receiver Frequency: 433.92MHZ

Receiver sensitivity:-105DB

Size: 30 * 14 * 7mm

TRANSMITTER MODULE PARAMETERS:

Model: MX-FS-03V

Transmission Distance :20-200 m (dependent on supply voltage)

Operating Voltage :3.5-12V

Dimensions: 19 * 19mm

AM transfer rate: 4KB / S

Transmission power: 10mW

Emission frequency: 433M

PINOUTS:

TX MODULE MX-FS-03V	
PIN	DESCRIPTION
1	GND
2	VCC (3.5 – 12V)
3	TX DATA

RX MODULE MX-05V	
PIN	DESCRIPTION
1	GND
2	RX DATA
3	RX DATA
4	VCC (5V)

Good value for money

★★★★★

Very pleased with my recent order for 20 of these units, they've all performed as expected. I'm running them at 5V giving me a break-down range of 15m (inside a house, through an internal wall and a floor). I'm using a 6mm-diameter coiled 340mm-long half-wave antenna (required by the product) so this unit might perform slightly better using a whip ... configuration.

My most favorite electronics reseller.

★★★★★
I love your website, the price are great and I usually receive my order, 2 or 3 days after I confirm it.
I try to avoid visiting it too much because everytime there are new stuff and I ended up ruins at the end of the month. ^^

I also always had an answer when I ask something and the example code is great to have a overview of what you can make wi... [▼](#)th the components.

And great job at providing 433Mhz PT2262/PT2272 have been searching for theses at a reasonable price everywhere! [▲](#)
